McLAUTHLIN'S PATENT DROP-TUBE SAFETY STEAM BOILER,

Combining large steam and water space; perfect circulation; entire freedom from unequal expansion; ample heating surfaces; superior draft; suspension entirely within the fire chamber; protected brick work, the supply of air passing down its air-spaces, which also prevents waste of heat through it; perfect combustion secured by a large fire-chamber supplied with heated air; manifold blow-off, which, combined with the enforced circulation, admits of using water that would prove dangerous in ordinary boilers; distributive safety feed, &c.

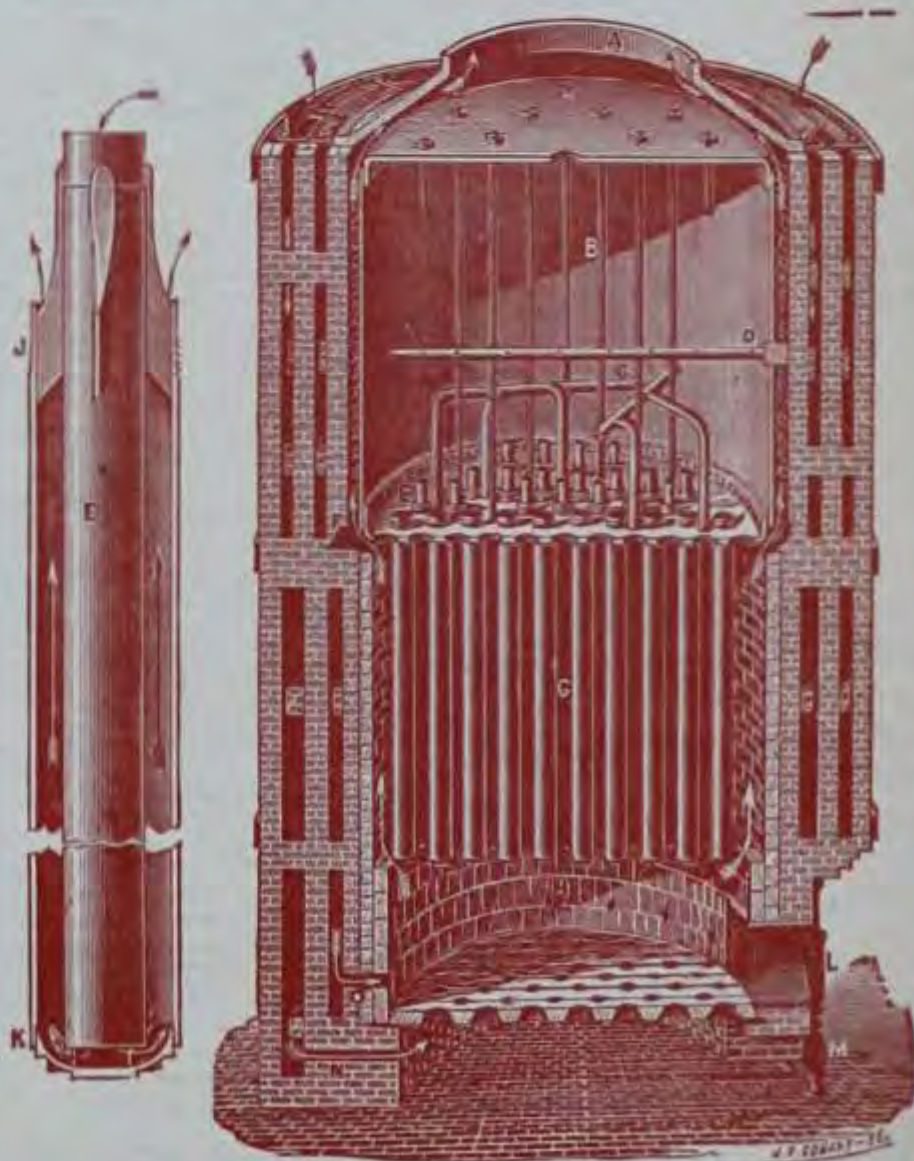

These boilers have proved, by 12 years' use, remarkably economical and free from repairs or accident. They give the maximum of effect for a term of years at the minimum of cost. They are made only of superior strength, materials, and workmanship, and are sold at the cost of ordinary boilers.

THE LARGE CUT IS A VERTICAL SECTIONAL VIEW.

A is the central smoke flue; B the steam and water cylinder; C the water-tubes projecting through the tube sheet, in which are the circulating tubes E, extending above the large tubes. These are omitted in the front row IN THE CUT. At C is the manifold blow-off, arranged to draw from the surface of the crown sheet; D is the distributive safety feed-pipe; E is the supporting ring, having projecting lugs on which the boiler rests. The ascending arrows show that the boiler is entirely enveloped in the fire and gases. The descending arrows show the supply of air through the brick-work, and apertures Q above the fire and N below it, which is regulated by the registers at the top.

THE SMALL CUT

shows one of the pendent tubes enlarged, the external tube in section, and the internal tube and tube holder in place. The circulating tube E rests on centering lugs on the plug K which is screwed into the large tube. The tube holder at the top sustains itself by spring pressure, and receives the circulating tube loosely within it.

FIRE-BOX BOILERS AND ORDINARY BOILERS FURNISHED AT SHORT NOTICE.

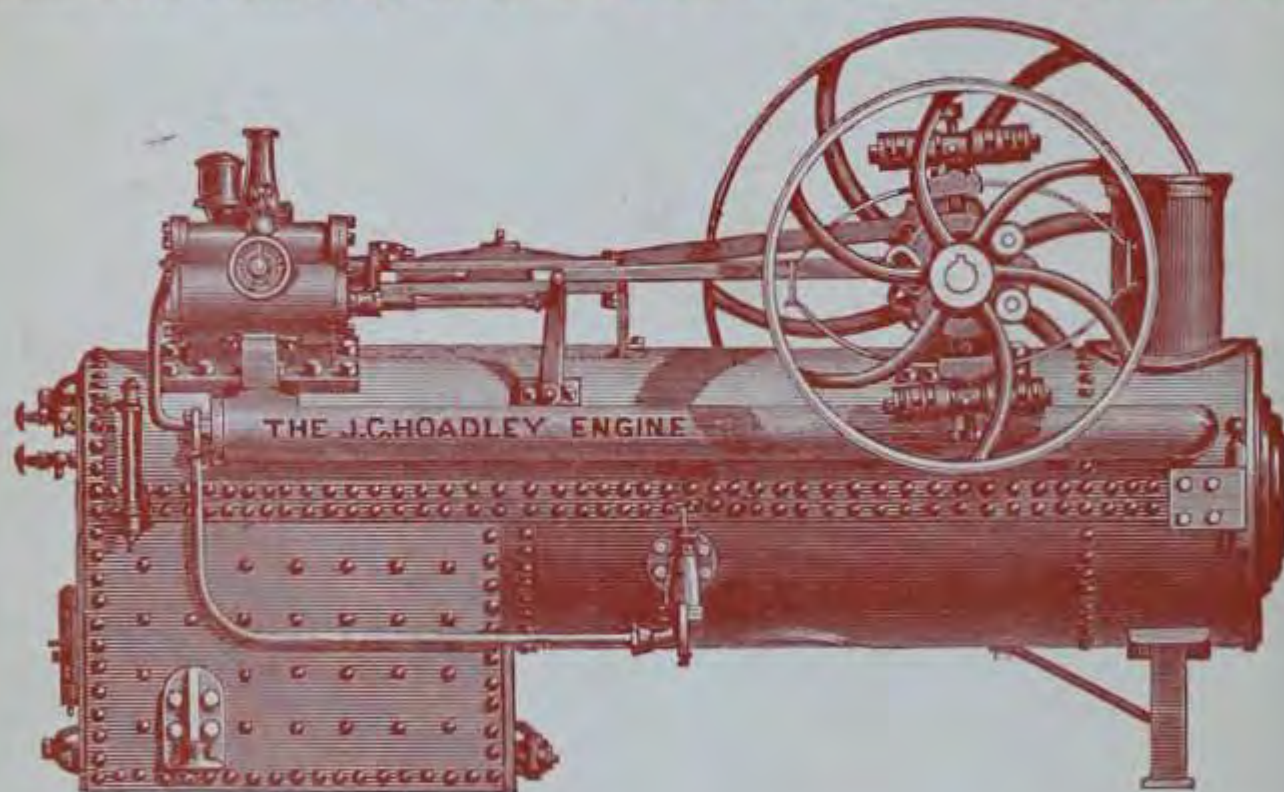

THE HOADLEY PORTABLE ENGINES!

All Sizes from 9 to 100 Horse Power.

We are the only makers of these wonderfully efficient and economical variable cut-off Engines. They have no competitors in economy of fuel and of water.

They are widely known, and have attracted the favorable attention of many expert Steam Engineers, both at home and abroad. At the CENTENNIAL, after the most thorough and exhaustive tests, the HOADLEY PORTABLE ENGINE received the highest award, and the highest possible approbation of the Judges, as their reports show.

We apply these improvements to the OLD STYLE HOADLEY, or to any other first-class, strongly made Throttle Regulating Portable Engines, AND GUARANTEE **ONE-THIRD GAIN IN POWER** FROM THE SAME BOILER AND FUEL.

The cut shows the unmounted Engine complete, except the smoke pipe.

We mount them on wheels for agricultural and other uses, in sizes up to thirty-five horse power.

WE ALSO MAKE

STATIONARY HOADLEY ENGINES,

UNDER THE SAME PATENTS, UNEXCELLED IN ECONOMY, AND OF MODERATE PRICE.

ELEVATORS.

Our heavy Freight Elevators are made with large drums, and with much care in regard to **STRENGTH, SIMPLICITY, DURABILITY, and SAFETY.** For a Freight Elevator of their class they are without a competitor in price, and none are operated with better satisfaction in all respects, as is well attested by their extensive adoption by many of our best firms, corporations, and architects.

The engraving, though a very imperfect representation of our present Freight Elevator, gives a general idea of it. The carriage is shown suspended by the automatic levers, as in case of accident to the rope.

We make and put up these Elevators on various plans, to meet the requirements of all locations and uses.

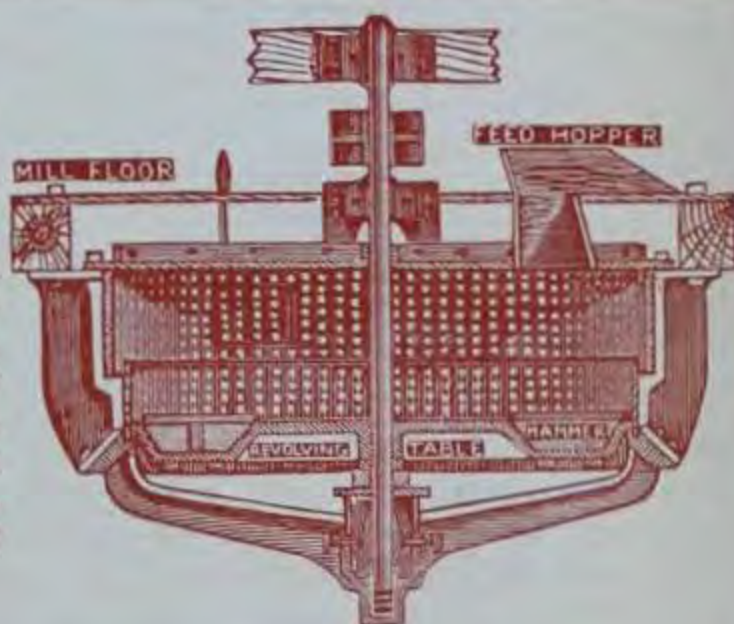

We also make **PASSENGER ELEVATORS, CARRIAGE ELEVATORS, HAND ELEVATORS, HOISTING WHEELS, and HATCH COVERS.**

THE PATENT MAGIC CRUSHER

is adapted to all friable and most semi friable substances. It consists of a revolving table with steel hammers attached placed upon a vertical shaft, and surrounded by a perforated casing, within which it revolves and through which the crushed material is discharged. The material thrown in receives at the rate of 5000 blows per minute. No Crusher known works with less power or less wear and repairs. It crushes easily five tons an hour, and costs less than any other of similar capacity.

The cut is a vertical sectional view.

THE PATENT MAGIC PULVERIZER

Has proved by years of practical work its superiority for pulverizing friable and semi-friable materials. No dressing is required, and the wearing parts are easily replaced.

It consists of a horizontal cylindrical case, with a rapidly revolving shaft carrying steel paddles in the first part and exhaust-fans in the second, the combined operation of which creates concussive action of the grains upon each other in millions and in numberless repetitions, the material only escaping the combating vortices by the exhaust current, which is regulated for the fineness required.

It has been successfully used on a wonderful variety of materials, including ores, minerals, mica, glue, bones, asbestos, sugar, grains, dried roots, paints, chemicals, fertilizers,

etc., and for GRANULATING corn meal, glue, etc. It has also proved valuable for TRITURATING LIQUIDS.

The engraving shows a small machine thrown open. A hopper to be placed at the "feed" aperture conducts the material into the machine. The diaphragm seen within the casing is proportioned for medium work; for coarse it is made narrower, and for fine, wider. The paddles to the right of it cause the attrition of the material, as it whirls from all sides, into the vortices they create. The exhaust-fan to the left of the diaphragm draws the pulverized material through as fast as it becomes fine enough, and discharges it into a settling chamber to be connected to the pipe marked "outlet."

THE TEST TURBINE WATER-WHEELS.

Over thirty years' experience in the water-wheel business, and a series of 5300 of the MOST ACCURATE COMPARATIVE TEST EXPERIMENTS ON RECORD, have led to the production of our No. 1 and No. 2 Test Turbines.

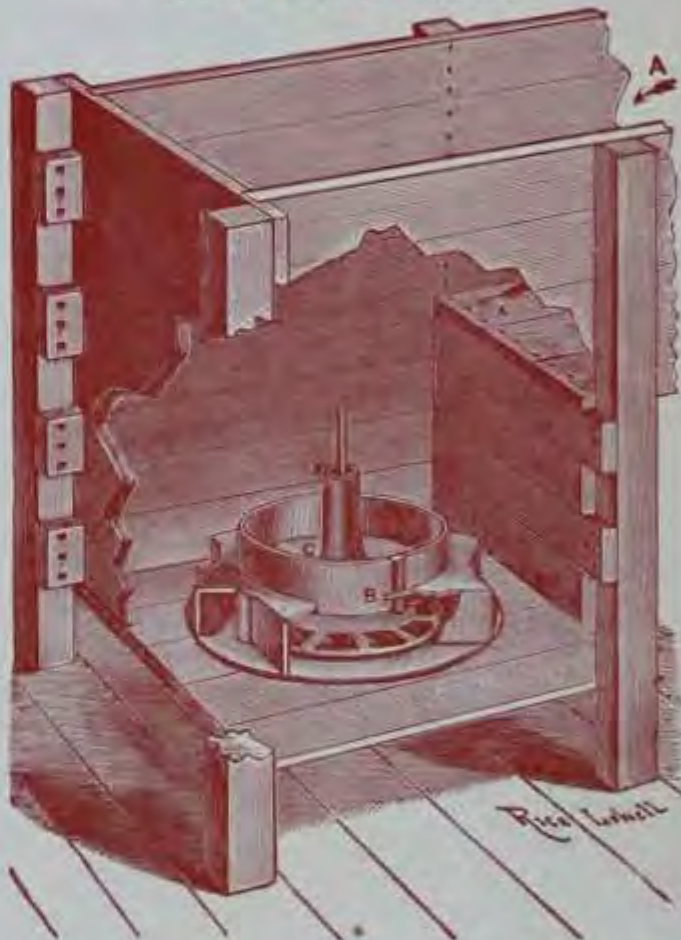

Our special aim was the production of wheels which, for a term of years, working under the varying conditions mills are subject to, should prove the most economical in the use of water, in first cost and running cost, and the most reliable and efficient. The No. 1 Test Turbines have not their equal as a whole; and the No. 2 are not excelled for use where a reliable and efficient wheel is wanted AT MODERATE COST.

No. 2 Test Turbine.

The cut of the No. 1 shows the gate B C nearly open. It shows in this case a hollow gate stem surrounding the wheel shaft to which the hoisting gear is to be connected. The upper part of the shaft and gate stem are not shown. B is a guide lug upon the gate. The gate slides up within the spout casing, and when closed, rests upon a seat at its rim, just above the level of the wheel.

No. 1 Test Turbine.

The No. 2 is shown in iron casing, complete; ready to connect to the flume. The gate is shown open. The upper part of the shaft is not shown.

[MASSACHUSETTS LAWS AND RESOLVES, 1880. CHAP. 132.]

AN ACT to enlarge the powers of Justices of the Peace and to abolish the office of Justice of the Peace and of the Quorum.
Be it enacted, &c., as follows:

SECT. 1. Justices of the peace shall hereafter have and exercise the powers and authority now conferred by law upon justices of the peace and of the quorum, except the right to act as magistrates for the examination of poor debtors under the provisions of chapter one hundred and twenty-four of the General Statutes and acts in amendment thereof. They shall also have jurisdiction and the right to act in any and all the counties: *provided*, that nothing herein shall be construed to authorize any justice of the peace to take bail in any judicial district other than that for which he is designated and commissioned under chapter two hundred and fifty-four of the acts of the year eighteen hundred and seventy-nine.

Tenement-Houses.

For the use of water in model or tenement houses, which are rented in suites of rooms to different families, the rate of charge for each such tenement shall be based upon the rental of such tenement, viz: Every tenement occupied, and having a faucet within the same, shall be charged *three dollars* annually, and *fifty cents* additional on every one hundred dollars, or fraction of one hundred dollars, rent above three hundred dollars; provided that the said rate may be based upon the estimated yearly rentable value of each such tenement. In addition to the foregoing rate, there shall be charged to each tenement in which a water-closet or bathing-tub is used, *three dollars*, or in which both are used, the sum of *five dollars* annually.

Each tenement in which there are no water fixtures, the occupants taking the water from taps in common with other tenants of the house, shall be charged *two dollars* annually; and an additional charge of *two dollars* annually shall be made to each tenement the occupants of which use a water-closet in common with other tenants.

Buildings.

For the use of water in buildings occupied for offices, or by different tenants for business purposes, viz: For each office or tenement having a faucet within the same, *three dollars* annually; and for each office or tenement not having water within the same, but taking it from faucets in common with other tenants, *two dollars* annually. And in addition to these rates there shall be charged for each water-closet within the office or tenement, *three dollars* annually; and, when the water-closet is located so as to be used in common, the charge for each office or tenement shall be *two dollars*.

Hotels and Boarding-Houses.

Hotels, taverns, and boarding-houses (said boarding-houses being valued for the assessment of taxes over \$15,000), not including water for baths or for uses without the house, shall be charged, for each bed for boarders and lodgers within the same *three dollars*; provided, that in no case shall any hotel, tavern, or boarding-house be charged less than if occupied as a private dwelling-house.

Stores and Shops.

Each tenement occupied as a store, warehouse, office, shop, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water, shall be charged from *six to twenty-five dollars*. For each water-closet more than one, supplied for the above, there shall be charged *five dollars* additional. And for each urinal, wash hand-basin or sink, more than one, *two dollars and fifty cents* additional.

Steamboats shall be charged, for estimated quantities of water used for boiler and domestic purposes, at the rate of *six cents* per one hundred gallons; provided, however, that in cases where meters are applied, the charge shall be *two cents* per one hundred gallons.

Building Purposes.

For building purposes there shall be charged for each cask of lime or cement, *seven cents*.

Fountains.

Fountains are to be supplied with water at the discretion of the Water Board; and the charge shall be upon the estimated quantity used, namely, for each one hundred gallons daily consumption, *five dollars* per annum.

Manufacturers and other parties, supplied with water by estimated quantity, shall be charged at the rate of *three cents* per one hundred gallons.

When water is required for purposes which are not specified in the foregoing tariff, the rate shall be fixed by the Water Board.

Whenever two or more dwelling-houses, or other estates, are valued together for the assessments of taxes, it shall be the duty of the Water Registrar, under the direction of the Water Board, to make a separate valuation of the same; and whenever a portion only of any estate is justly chargeable for any water rate, it shall be the duty of the Water Registrar to make a proper valuation of the said portion; and the water rates heretofore provided shall apply to such valuations respectively.

Meters.

When large quantities of water are required, as in the case of railroads, hotels, manufacturing and other establishments, the Water Board shall have power to ascertain by meters the amount of water used; and the proprietors or occupants of hotels, taverns, boarding-houses, or any other establishment using large quantities of water, shall also have authority to place within their premises, at their own expense, a sufficient water-meter, to be approved by the Water Registrar, for the purpose of measuring the quantity of water by them respectively used. The charge for the use of water by meter shall be *two cents* for one hundred gallons, to be collected quarterly by the Water Registrar; and all such bills shall be paid within ten days thereafter, or the Water Registrar shall cut off the supply after sending a summons as provided below.

Non-Payment.

In all cases of non-payment of the water rate for sixty days after the same is due, the Water Registrar shall serve a summons at the premises of such delinquent; and unless said rate is paid within three days thereafter, together with twenty-five cents for said summons, the Water Registrar shall cut off the supply; and the water shall not be let on until the amount due, together with the twenty-five cents for said summons, and two dollars for the shutting off and letting on, is paid; provided, that no occupant shall be required to pay the amount due from a former occupant; and provided, also, that in cases of specific supplies, or for fractional parts of the year, when the water has been let on the summons may be served, and the water cut off immediately; and it shall not be let on again except upon the conditions before mentioned. The foregoing provisions shall apply when two or more parties take water through the same service-pipes, although one or more may have paid the proportion due from him or them.

PATENT REVERSIBLE HEEL,

For Boots and Shoes.

MANUFACTURED BY

Letters Promptly Answered by
J. S. CHRISTIE, General Manager.

THE REVERSIBLE HEEL COMPANY,

105 SUMMER STREET, . Room 17, . BOSTON, MASS.

The shell or outer part of this Heel is Malleable Iron, coated with Black Enamel, presenting a splendid finish, superior to the best finished Leather Heel.—It is thoroughly fastened by a machine to the boot the points of the nail being smoothly imbedded into the inner sole, do not hurt the heel nor wear the stocking.—The center piece is filled with wood on both sides, and they never drop out, giving a remarkably durable level wearing surface.—These center pieces are interchangeable and Reversible, giving the Heel four distinct wears.—The outer shell comes up to and rests against the Counter, and prevents running over.—It supports the ankle, whether weak or strong.—It adds 25 to 50 per cent. to the wear of the Boot or Shoe.—It saves time and expense of getting heels repaired.—It is the best, most durable, least expensive, and the most practical Common Sense Heel ever applied to Boots and Shoes, whether sewed, pegged, nailed or standard screwed.—It is the best Heel ever applied to Men's, Boys' and Youths' RUBBER BOOTS. Being applied by a machine under great pressure, they will not leak a particle.—They will not wear off round at the bottom.—Rubber Boots are not complete without them.—Any person with a screw-driver at hand can readily make all the necessary changes, whether on Leather or Rubber goods. To large buyers we would say, we have seen numerous Manufacturers, all of whom state that they will adopt them cheerfully, if their customers call for them. Hence a line of these goods can be obtained readily, by leaving orders with your Manufacturers.—All Retail Dealers should ask the Manufacturers and Jobbers from whom they buy to keep a full line of these goods. Manufacturers and Merchants are requested to call at this office and examine samples, and the Machine for applying the HEELS.

TRUSSES.

A LARGE ASSORTMENT OF BEST PATTERNS from which to select to meet the requirements of each case. If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable Truss carefully fitted by a competent and experienced person familiar with the anatomy of hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person two inches below the top of the hip-bones. If the rupture is at the navel, the measure should be around the body at the navel.

Of these goods we have several classes of silk and cotton, possessing different degrees of elasticity, the stout silk being usually the most satisfactory. A GOLD MEDAL has lately been awarded us by the Middlesex Mechanics' Association, as will be seen from the following report, signed by a leading New England Surgeon and Physician:—

"1503. CODMAN & SHURTLEFF, Boston, Mass. One Case Surgical Instruments and Atomisers.

"The Committee have no hesitation in awarding for this superb exhibition the highest premium. *** The various other instruments for inhalation of Atomized Liquids, and for Local Anæsthesia, were all apparently faultless, both in design and workmanship. The exhibitors are regarded as more especially deserving of the highest token of merit for having produced nothing except of their own manufacture.

GOLD MEDAL.

Carriage roads or other places having heavy traffic we lay down in Trinidad Asphalt. There are over fifty miles of streets of our own work in New York, Baltimore, Washington, Philadelphia, Chicago, Boston, and other cities in the United States.

We have extensive and elaborate machinery, and have the best skilled workmen that Europe or America can produce. We are established to supply a want hitherto supplied exclusively from New York.

Moulds Made and Bottles Blown to Order.**THE EUREKA VENTILATION CO. OF BOSTON.**

OFFICE AND MANUFACTORY, - - - 74 CHARLESTOWN STREET.

We respectfully call the attention of the Public to this improved Ventilator, and in doing so, point out some of its excellencies and advantages: It can be easily applied to new or old buildings; it is simple in its construction; durable and cheap, as no part can get out of order, and will last a life-time; the peculiar construction and arrangement of its parts render it a perfect preventive against down-draughts, which is the case in lowering windows; it is perfectly **Storm-Proof**, and put together in a thorough manner—the proof of its success is renewed orders from old customers.

The following List of places where these Ventilators are in use is selected from many highly valued testimonials, as evidence of the high esteem in which these Ventilators are held by those whose practical experience and constant observation entitle them to judge of its merits:—

VENTILATORS IN SCHOOL-HOUSES.

Newton, Newtonville, West Newton, Newton Upper and Lower Falls, Newton Centre, Auburndale, Boston, Brighton, Allston, Watertown, Chelsea, Provincetown, Middleboro', Brookline, Wellesley, Salem, Natick, Foxboro', Woburn, Winchester, Malden, Fall River, Melrose, Needham, Germantown, West Roxbury, Jamaica Plain, New Bedford, &c. &c.

VENTILATORS IN CHURCHES.

Boston, Newtonville, West Newton, Charlestown, Somerville, &c.—We give special attention to Churches, School-Houses, Private Houses, and all kinds of Buildings. We make Ventilators to suit all the thicknesses of walls, wood or brick.

This Ventilator is now meeting with great success with architects in this and other cities.

BEWARE OF INFRINGEMENTS! such as improvements, for we shall hold all persons infringing responsible for the same, as we are the only manufs. of the "EUREKA VENTILATORS."

S. D. HICKS & SON, COPPERSMITHS

AND MANUFACTURERS OF

SHEET METAL CORNICES, MOULDINGS & ORNAMENTS, OF COPPER & GALVANIZED IRON.

WE MAKE A SPECIALTY OF

Austin's Patent Expanding Water Conductor, or Rain Water Spout, for which we are the Sole Agents for Boston and vicinity.

Its merits need only to be known to be adopted, as the increase of our yearly sales indicate. It is the ORIGINAL and ONLY legitimate Expanding Conductor in the market, and is warranted not to burst by freezing. It is made from the best of Iron and Galvanized after it is made, thereby filling the seams and galvanizing every part thoroughly. Metal workers will see the advantage of this, on account of the galvanizing not being broken and leaving the iron exposed, as is the case with conductors made from the sheet and put through a machine. It has no loose seam to leak or strain apart. It comes in nine-foot lengths, fitted for loose joints or soldering, and elbows that can be used for goose necks or offsets and shoes. Sizes, 2 to 8 inch diameter. The price will be kept as low as possible. List and samples sent on application.

FELT ROOFING.

"BEE HIVE BRAND."

For Twenty-Eight Years the "Standard" in New England.

Guaranteed to possess every advantage claimed for any other Roofing, whether of Asphalt, or Coal Tar Materials.

LEVI L. WILLCUTT, Pres't.
 J. L. ROSS, Treas'r.

Experiments, based upon theories, are unreliable in forming an opinion regarding the durability of any Roofing.

The only satisfactory and reliable test of a Roofing Material, is in the actual wear, after exposure to the elements for a series of years.

Samples of the "BEE HIVE BRAND ROOFING," in wear for over twenty years, can be seen at the office of the manufacturers, giving proof positive of its durability.

For more than a Quarter of a Century the "BEE HIVE BRAND ROOFING" has been used for covering the most elegant Residences, many Public Buildings, and the finest Stores and Warehouses in Boston and elsewhere.

The year succeeding the great fire of 1872, upwards of Twenty Acres of this roofing was placed upon new buildings erected in the Burnt District.

The Organization established by this Company, for the forwarding of the business in New England and elsewhere, is continued. Reliable, Practical Roofers, using only the genuine material, are located at all important centres, prepared to execute orders with the greatest promptness and by the most approved methods.

The Independent

"The foremost religious newspaper of the United States."—JOSEPH COOK.

THE INDEPENDENT seeks the patronage of the public on three grounds, as follows:

- 1st. *It is the largest religious newspaper published.*
- 2d. *It employs as contributors more able writers, at home and abroad, than any other weekly newspaper.*
- 3d. *It gives its readers a wider range of topics and more and fuller departments than they can find elsewhere.*

THE INDEPENDENT consists of 32 pages, neatly cut and pasted. It is printed from clear type (we stereotype the pages weekly, and, hence, every issue is really printed with new type) and on good paper, and mechanically it is unexcelled.

The list of our contributors embraces names which are known throughout the nation. We may mention some of them:

There is no question of prominence in religion, politics, science, education, finance, or any other department of human knowledge which the THE INDEPENDENT does not discuss. It has regular departments devoted to Biblical Research, Missions, Religious Intelligence, Book Reviews and Literary News, the Sunday-school, Education, Science, Sanitary Questions, Fine Arts, the Movements of Ministers, Personalities, News of the Week, Financial and Commercial matters, Flowers and Farming, Insurance, Weekly Market and Dry Goods Reports, Prices Current, Cattle Market, Etc. In its religious department it gives news and statistics of all denominations of Christians, everywhere. In fullness, accuracy, and comprehensiveness this department is unequalled. Several columns of stories and poems adapted to old and young are given every week, with a column of puzzles.

From time to time sermons by eminent ministers are published. The current topics of the day are discussed in our editorial columns freely and vigorously. We are not afraid to state our opinions.

OXFORD AND CAMBRIDGE UNIVERSITIES,

—BY—

E. R. HUMPHREYS, LL.D.,

Formerly of Cambridge University, Author of various Classical Works, for which see Duykinck's Encyclopedia.

DR. HUMPHREYS has, under the new system at Harvard, been even more successful than formerly with his pupils, two of whom were admitted with DOUBLE HONORS in July, 1880. He reads with ladies, as well as young men, and undertakes to prepare for College, in two years, any youth or young lady who has had a good English and Mathematical training with an earnest purpose, and who will implicitly follow his advice. He is in constant communication with Professors and Fellows of Colleges at Oxford, Cambridge, London and Edinburgh, and is thus kept au courant with all changes in books and Examinations at these Universities. Three boarding pupils, giving thoroughly satisfactory references as to disposition and character, are received. In the SUMMER VACATION Dr. Humphreys reads with Teachers seeking promotion, and College pupils during nine weeks. Terms can be learned on application to

May be returned and Money refunded, less postage, if not satisfactory.

By adopting our Burner you have the best regulator in the world, without reducing your light, as with the common regulator attached to meters, which reduces the light just in proportion as it reduces the pressure on the gas; whereas with the **Ellis Burner and Regulator**, the light is increased by obtaining as perfect combustion as is possible from gas, and that in the most simple manner.

Office, 54 Kilby, cor. Water Street,
BOSTON.

This Company beg leave to call the attention of
Cities and Towns wanting a **Superior** Street
Light, to their facilities for furnishing the same.

Being owners and lessees of valuable patents used
in this business, which together with the low price
of fluid, enables them to guarantee a light exceed-
ing in brilliancy and cheapness of price anything
heretofore attempted. They particularly call the
attention of all interested to the fact that the light
supplied by this company is **permanent**, not
subject to being easily extinguished by the wind
or by defects in the lantern, a matter of great im-
portance in lighting streets. Contracts made for
one, three or five years, as committees may desire.
The long experience of the officers of this Com-
pany in lighting streets with gasoline warrants
them in promising faithful work and prompt at-
tention.

Stylish and Tasty as a French Corset, yet combining ease and comfort with elegance and shape.

HOUGHTON'S AUTOMATIC HOUSE PUMP.

CHARLES HOUGHTON, Patentee.

Operated by the surplus heat of the cooking range or stove, without interfering with the ordinary use, and without additional fuel or any attention whatever, it will draw water from the well or cistern, and force it to the storage tank at the top of the house, enough for all ordinary household uses, including baths, water closets, etc. It has no machinery or working parts subject to friction or wear.

Five years' constant use in a large number of houses has fully demonstrated its reliability and usefulness, and it is fully warranted as represented. It is sold, ready to put up, at \$225, and competent workmen to put it up ready for use will be furnished at a reasonable charge to the purchaser.

SOLD BY ALL RELIABLE PLUMBERS.
